License Registration using (*.lic) file

Notes

New

Status: Existing

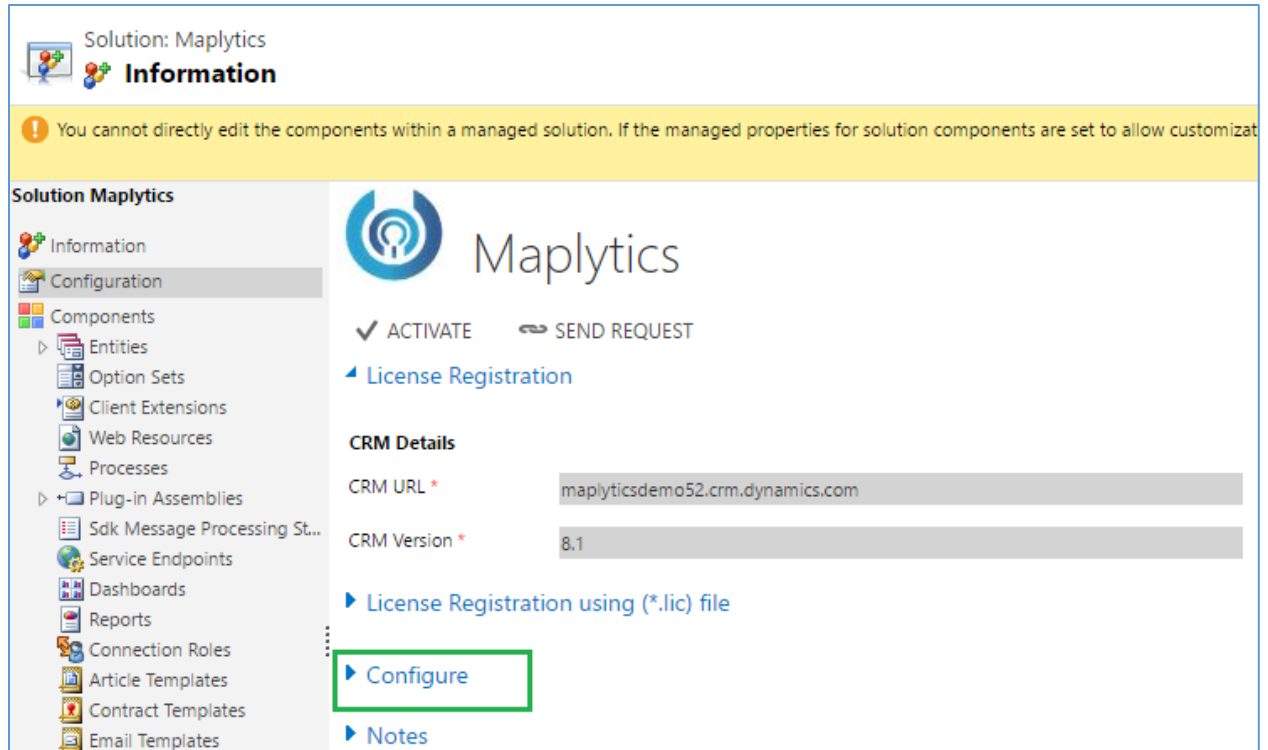

License Registration Steps:

1. **For trial version**, fill up data in **License Registration** section and click on **“ACTIVATE”** button which will activate the product license for 15 days. The license will be issued on the basis on details in **CRM Details** section. User License is the count of active users in CRM at the time of making the request for the license.

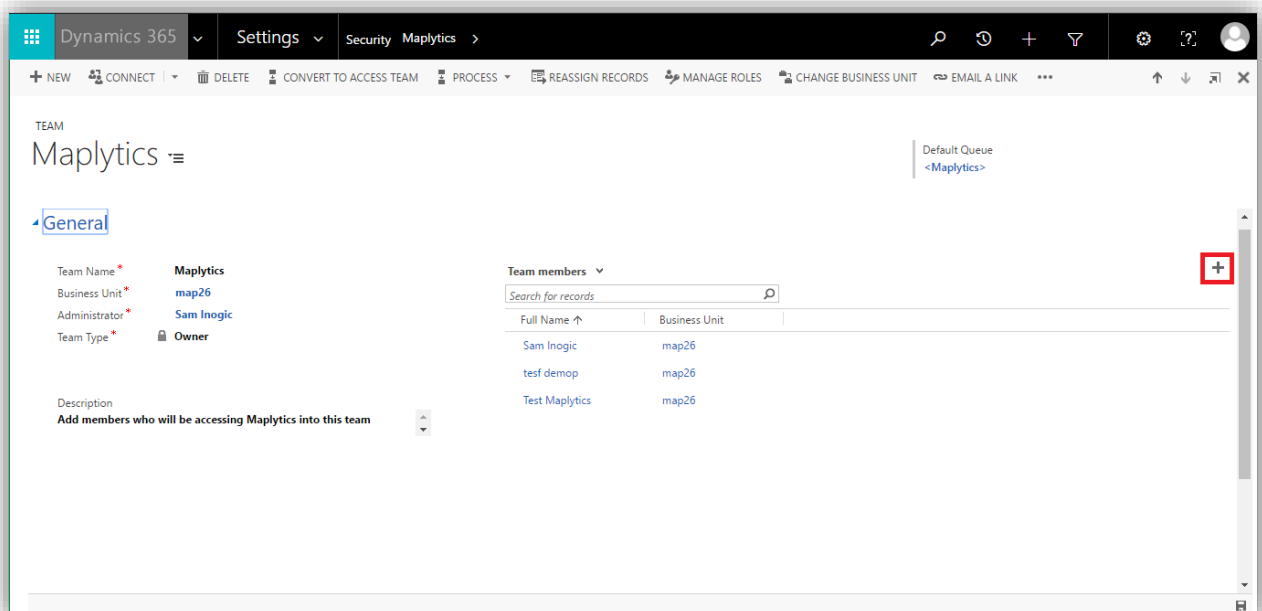

In case you are not able to “Activate” the license using Activate button, then we have provided an alternate option. In that case, we will provide you license file which you can browse from **“License Registration using (*.lic) file”** and click on **Register** button to activate the license.

2. In case of purchase or to extend the trial, click on **“SEND REQUEST”** button which will open an email with details entered in the **License Registration** section. You can send that email to us. Once we receive the extension request we will review the mail and process the request. Once the request has been processed you will receive an email from our end and then you can click on the **“ACTIVATE”** button to activate/extend the license.
3. To install the sample Dashboards and Entity Map records click on the **Configure** button. You can refer the **User Manual** to add custom Dashboard Maps as per your requirements.

Maplytics™ - License Registration

4. On successful completion, it will open tab with Team Maplytics created. User need to add required Member to the Team as shown below:

Note: We're auto assigning 'Maplytics User' role to Team 'Maplytics'.

Maplytics™ - License Registration

5. To customize Maplytics, please make sure to assign 'Maplytics Admin' security role to the required member. Please find below the description of Maplytics' s security roles:

Maplytics Admin: Assign this security role to Administrator/s of Maplytics where they can have access to all custom entities specific to Maplytics like entity map, etc. Admin role should be assigned to individual who would be involved in configuring and creating Entity Maps and Dashboards for Maplytics.

Maplytics Users: Assign this security role to all other users who would be only using Maplytics.
