

**Import Pick List Values**

**Import Pick List Values**

## Import Pick List Values

### Aim:

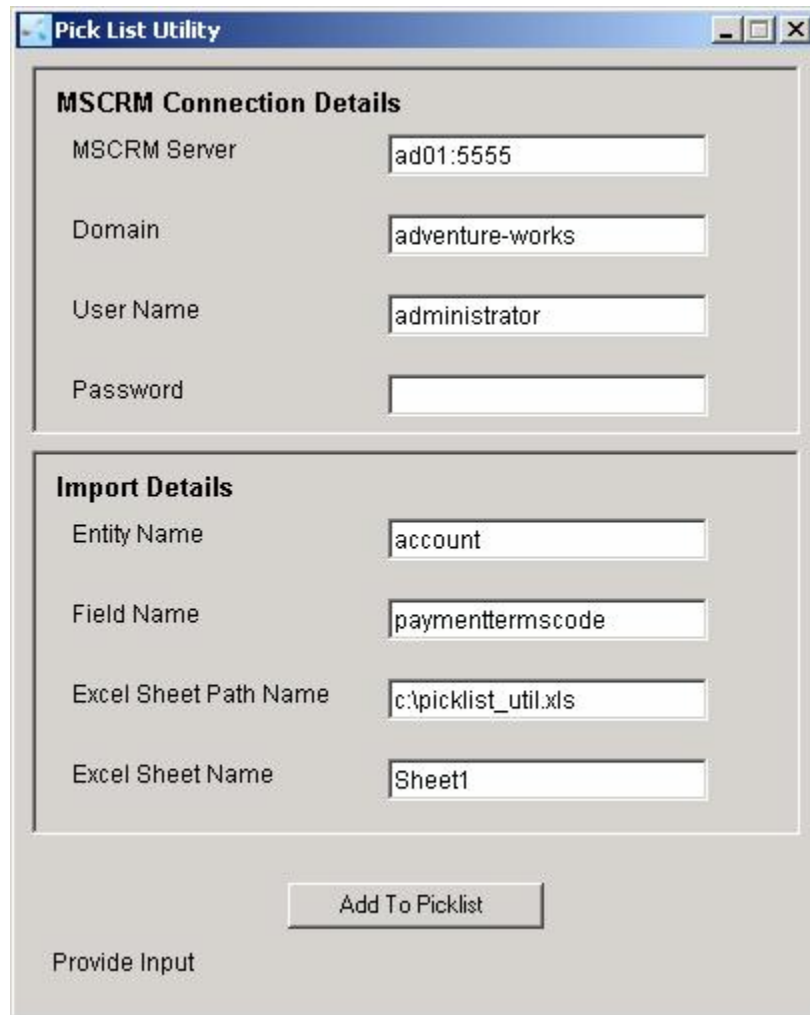

This utility allows for auto-populating of Pick list values for a Pick List attribute. You can have all the values to be added, put in an external document.

### File formats supported:

This utility is designed to import from most of the common file formats like .csv, .xls, .xml.

### Usage:

It runs as an external application. It will search if the values already exist in the Picklist and only add the new values to the Pick List.

The screenshot shows a Windows-style application window titled "Pick List Utility". The window is divided into two main sections: "MSCRM Connection Details" and "Import Details".

**MSCRM Connection Details:**

- MSCRM Server:
- Domain:
- User Name:
- Password:

**Import Details:**

- Entity Name:
- Field Name:
- Excel Sheet Path Name:
- Excel Sheet Name:

At the bottom of the window, there is a button labeled "Add To Picklist" and the text "Provide Input" below it.

All that is required from the user is the following information

- CRM server name, credentials for logging into CRM
- Name of the entity and the attribute to which the values need to be added.
- Location of the file that contains the values to be added.

## Import Pick List Values

### Features:

- 1 **One click utility:** Only basic information requested from the user.
2. **Time saving:** By automating the process of adding the values to the picklist, it saves a lot of time and effort on the part of end users.
3. **Multiple File formats supported**
