

Price List Import Utility for Dynamics CRM

Why Price List Utility?

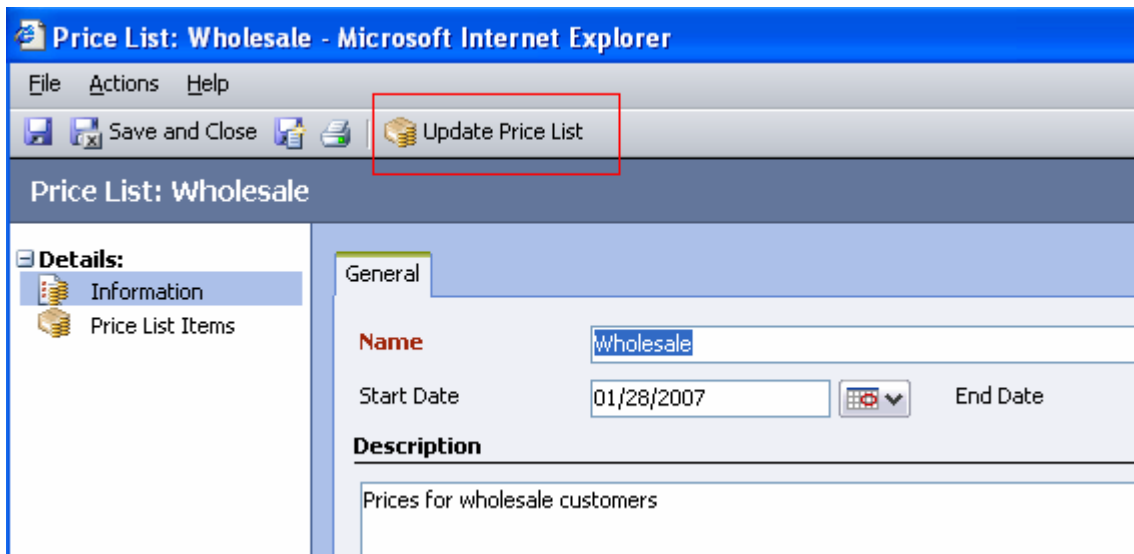

MSCRM does not have an option to import Price List. You normally receive a Price list in an external document. You need to manually update the price of each of the products in the price list. This can be a very time-consuming job.

Aim:

This utility allows for auto-setting of Prices of products in a Price List. You can import the price list available with you in an external document.

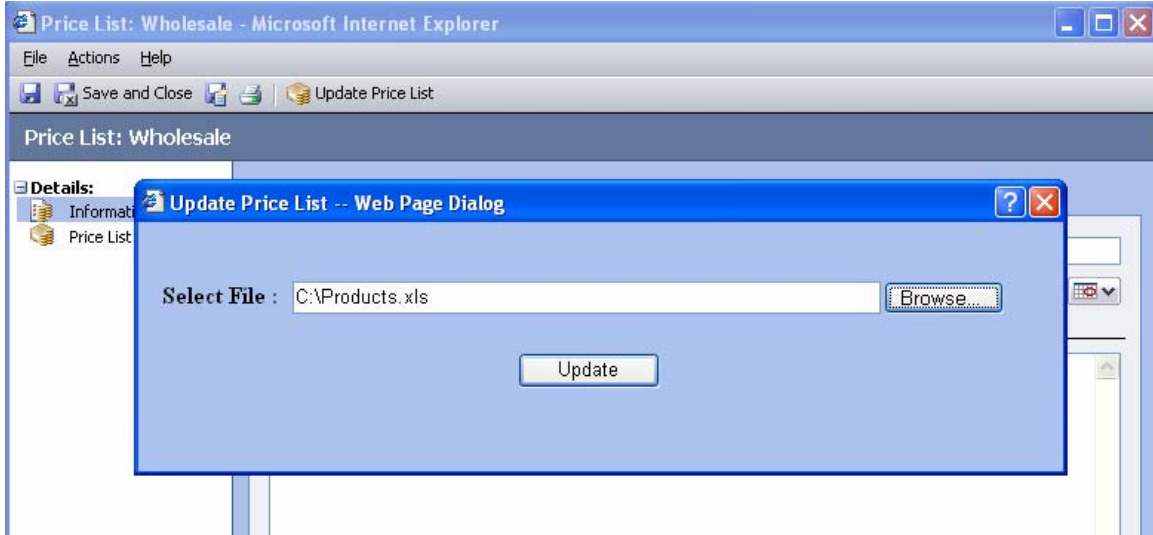

File formats supported:

This utility is designed to import from most of the common file formats like .csv, .xls, .xml.

The option for importing the Price List is provided within the Price List form itself

Price List Import Utility for Dynamics CRM

All that is required from the user is the location of the file to be imported.

Features:

1. **One click utility:** Need to provide only the path of the external file that contains the revised prices for the products.
2. **Easy to use:** No need for spending time on learning how to use the utility.
3. **Seamless integration with MSCRM.** No need to run any external application to update the prices.
4. **Multiple File formats supported**
5. **Extensible:** Can be customized for user specific requirements
